

## STATE PROCUREMENT OFFICE REQUEST FOR RESTRICTIVE SPECIFICATIONS

TO: Chief Procurement Officer

FROM: Judiciary

*Name of Requesting Department*

*Pursuant to HRS §103D-405 and HAR chapter 3-122, Subchapter 3, the Department requests approval for the use of restrictive specifications.*

1. Describe in detail the goods needing restrictive specifications.

Services of Security Resources (SR) are needed to furnish, install and integrate surveillance and recording systems, duress systems and security access systems into Hoapili Hale (courthouse) and the associated parking structure. Project will be competitively bid to qualified general contractors.

2. Identify the method of procurement to be conducted:

- Competitive Sealed Bidding (HRS §103D-302 and HAR chapter 3-122, Subchapter 5)  
 Competitive Sealed Proposals (HRS §103D-303 and HAR chapter 3-122, Subchapter 6)

3. Describe in detail the brand name specifications.

Security Resources will be the named vendor to furnish, install and integrate new work into existing security and access control systems independently owned and operated by The Judiciary and DAGS Automotive Management Division (AMD).

4. Explain in detail the following:

a. Why the brand name specifications are necessary to the department?

Both the Judiciary and DAGS AMD, which each operate and perform functions in the Courthouse Building and the Parking Structure, currently use proprietary security systems and security platforms that are managed and maintained through separate contracts by Security Resources. Work on systems owned by both agencies must be performed by Security Resources.

b. Why only the identified brand name item will satisfy the department's needs?

Security Resources manages and maintains systems for both The Judiciary and DAGS AMD under independent service contracts and is the only Hawaii-based vendor trained, certified and authorized to access, integrate, manage and maintain the proprietary systems in independent use by both The Judiciary and DAGS AMD.

c. Why it is not practicable to use less restrictive specifications?

The work of this project involves expansion and alteration of existing systems. If the work were opened to other vendors, existing systems including the proprietary security management platform and the security information management platform for each of The Judiciary and DAGS AMD would have to be replaced at significant extra cost.

5. For the identified brand name, provide a list of possible suppliers and how the list of suppliers were determined.

Security Resources is the only Hawaii vendor who can perform work on the existing systems without negating existing contracts or abandoning existing equipment and software, each of which would require replacement at significant cost in additional new hardware, software and programming. The Judiciary and DAGS AMD have each worked to build and unify their security systems on a statewide basis.

6. Identify the primary individual(s) who is knowledgeable about this request, who will conduct and manage this process, and has 1) appropriate written delegated procurement authority; and 2) completed mandatory training for the procurement method, and 3) who SPO may contact for follow up inquiry, if any.
