**Dear Chief Coordinator Letts,**

This letter is in reference to the distribution, service, and support of the Network Harbor Lighthouse System protecting your locations. Your Registered Network Harbor Lighthouse system includes the required software, hardware and licensing to integrate your existing CCTV Video systems, Access Control system, Keyboard Alert System, and DCIO Detention Center management system. Your system seamlessly integrates the security and building maintenance devices into a dynamic Graphical User Interface operating platform. In order to maintain the advanced integration of these systems you will require the support of a qualified trained integrator as well as the system manufacturers.

Security Resources, your Network Harbor Dealer of record, has achieved authorization as a Network Harbor *Enterprise level* System Integrator and, as of this date, they are the only system integrator that has achieved Enterprise Level authorization in the state of Hawaii. Further, as a matter of policy, all of the Network Harbor product end user accounts are registered to a specific authorized integrator for ongoing support and service for that account. This is to assure end users that they have an authorized dealer servicing our products.

The end user/customer account, as registered to the authorized integrator, is maintained and held in effect as the only company that is authorized to support the Network Harbor Products e.g. Lighthouse, KAS, SAVvault, SIPvault, and DCIO systems. The process of authorized account registration with our authorized integrators is to provide both the end users and system integrators with account protection and assurance. Network Harbor will not provide products, technical assistance or any other support to unauthorized companies or individuals who may attempt to maintain or service your registered system. This assurance is maintained as long as a) the system integrator maintains authorized status as a Network Harbor Dealer, and b) the end user/customer has not requested severance from their registered system integrator, and c) the end user has an active ASA support agreement as registered with the end user account. Security Resources has met all of the above criteria.

Thank you, and please feel free to contact me with any questions.

Sincerely,  
Network Harbor Inc.
